Note re: Tables 13 to 17.

Because of the confidential provisions contained in the Statistics Act, the details of production and shipments of rolled steel products, usually given in Tables 13 to 17 of this report, are not available for publication during the period of the strike at one of the major reporting plants. Cumulative figures for the period will be published when the strike is over.

Note re: Tables 13 to 17.

Because of the confidential provisions contained in the Statistics Act, the details of production and shipments of rolled steel products, usually given in Tables 13 to 17 of this report, are not available for publication during the period of the strike at one of the major reporting plants. Cumulative figures for the period will be published when the strike is over.

Because of the confidential provisions contained in the Statistics Act, comprehensive details of production and shipments of rolled steel products, usually given in Tables 13 to 17 of this report, are not available for publication during the period of the strike at one of the major reporting plants. However, certain product lines which are not affected by this situation are shown in Tables 13 and 14. Cumulative figures for the period will be published when the strike is over.

Note re: Tables 13 to 17

Because of the confidential provisions contained in the Statistics Act, comprehensive details of production and shipments of rolled steel products, usually given in Tables 13 to 17 of this report, are not available for publication during the period of the strike at one of the major reporting plants. However, certain product lines which are not affected by this situation are shown in Tables 13 and 14. Cumulative figures for the period will be published when the strike is over.
